

Food Defense and Food Fraud Awareness & its Risk Assessment

As the global environment changes rapidly, the production of safe food is a pre-requisite for the final consumers. What comes along with the potential food safety issues that we are now facing, is the growing food fraud and food defense issues due to economic gain and intentional actions from individuals. GFSI mandates all recognised standards to have a food defense and food fraud plan in place and this course develops the practical knowledge on how to implement the steps for a comprehensive food defense and food fraud plan.

Upon completion of the training, participants will:

- Describe the identification and application of food defense & food fraud
- Possess the knowledge on the application of risk assessment for food defense and food fraud

Course outline

- What is Food Defense and Food Fraud
- Difference between HACCP, TACCP and VACCP
- Threat assessment and its Mitigation Measures
- Vulnerability and its Mitigation Measures
- Practical Methodologies for Risk Assessment
