

Good Hygiene Practices for Manufacturers

In recent years, the food safety incidence rate has been on a downward trend with the joint efforts of food operators and consumers. In this case, food operators have greater responsibilities to safeguard the safety of their consumers by ensuring good hygiene practices are followed in food premise.

This course is designed for personnel involved in food processing and/or food manufacturing. The course aims to raise awareness of attendees on safe food handling, attendees will understand how microorganisms develop in food products and the consequences of poor hygiene practices.

At the end of the training, attendees will understand control of food safety hazards to prevent food borne illness, to assure food products will be produced within control from receiving of raw materials to end products.
